

CTS Announces the Grand Opening of North America and Vietnam Branches

January 21, 2011, Taipei, Taiwan - Connection Technology Systems (CTS) today announces the grand opening of its North America and Vietnam branches located respectively in California and HoChi Minh City. The establishing of these two new branches provide *fast local service*, including *faster sample delivery*, *faster RMA*, *easier payment process* and *local sales support*. It is one of the steps to fulfill our commitment in supporting our customers and the vigorously growing FTTX market.

As both the business and company expanding fast worldwide, CTS values the process of *Glocalization* as our next landmark to provide better service and products to our customers. With the establishment of these two branches, CTS now can provide local support in Northern Europe, North America and Vietnam, and more branching out programs are under way in 2011.

Contact our local branches today to find out more about our products and solutions!
